

Dear Colleagues,

After a very hard work and fruitful cooperation with well-known centers and experts, we are introducing to you, your new e-journal "Robotics, Laparoscopy and Endosurgery".

You will be able to find in our journal all you need for updating you and practical and clear descriptions of the new and established techniques in Robotics, Laparoscopy and Endosurgery. Our first journals will be more focused on the urology but more articles in the other branches of the surgery as well as basic sciences will follow them.

We are inviting all our colleagues to submit their valued scientific work including case and teaching videos to the journal. In this way your scientific work will be able to reach the maximum number of colleagues and will be more cited. Sharing your knowledge will optimally impact the scientific level of the medical community.

One of our main issues is to improve the education in the fields of Robotics, Laparoscopy and Endoscopic surgery. Therefore, the educational papers, videos and point of technique repots are more than welcomed in our journal.

Now the word is yours and we welcome you cordially in our e-journal "Robotics, Laparoscopy and Endosurgery".

With kind regards,

**Dr. Ali Serdar Gozen**

Associate Professor of Urology

Associate Editor, Robotics, Laparoscopy & Endosurgery

*Heilbronn, Germany*

*October 2015*
